#### **POLYP TRAP**

Product Desgin & Development is a key part of our business. By listening to our customers and end-users we strive to improve continuously. Just as important are the new ideas from our distributors, hospitals and clinics.

Our goals for the coming years is to launch several new innovative products. Besides ergonomics and costs we are also take into account the possibilities to use bio based material and minimalize the volume and waste.

#### **ENDOSS B.V.**

ENDOSS® B.V. was established in Breda, the Netherlands, in 2006 and focuses primarily on high quality disposables for endoscopy and CSSD.

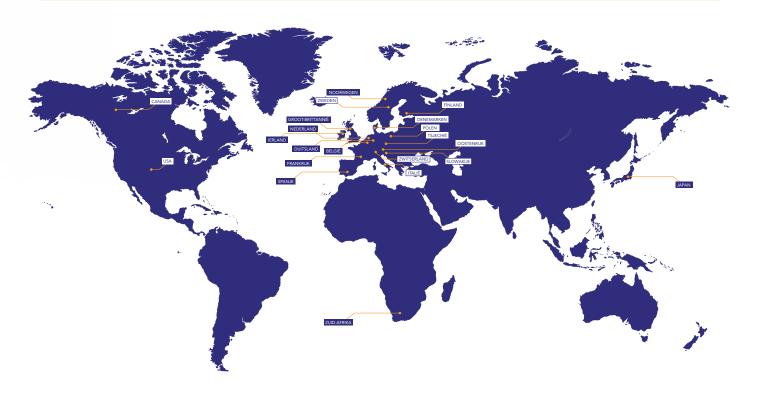

With our subsidiary in Germany and Sweden and a strong global network of distributors and suppliers we develop and create innovative products and services that enable hospitals and clinics to further guarantee patient safety.

With ISO13485:2016 certification for ENDOSS International BV we emphasize the importance of consistant quality. As our products are finding their way to different countries we strive towards compliance with not only CE MDR but also FDA en other national standards. ENDOSS INT is e.g. Authorised Foreign Manufacturer (AFM) in Japan. Our products are labeled in accordance with GS1 UDI standard.

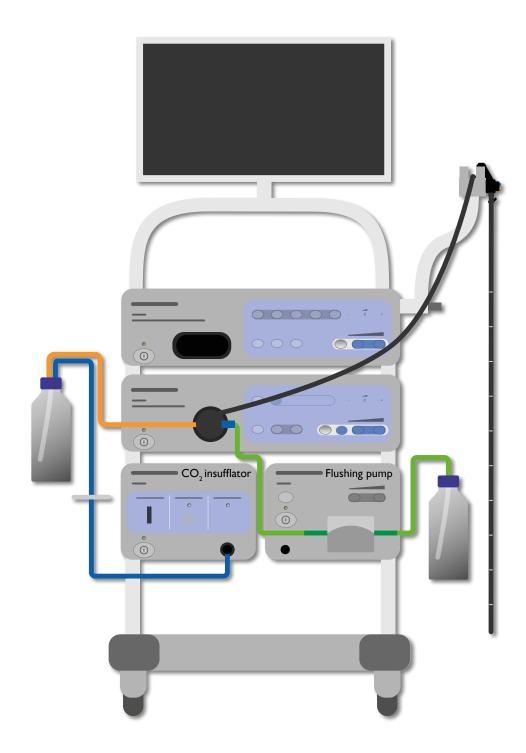

#### **VALIDOSS B.V.**

Endoss started validating in the Netherlands in 2010. In order to further specialize and distinguish our services, it was decided the validation services will continue under the name Validoss from 2020. Validoss is specialized in the validation of equipment for cleaning, disinfection, drying, sterilization, transport and storage. More info via www.validoss.com

#### HERE YOU FIND OUR GLOBAL SALES PARTNERS

# **ENDOSCOPY**

Endoss develops, designs, and distributes medical disposables. We are committed to improve patient safety and infection prevention. We do this by offering products for CSSD and Endoscopy, our fields or expertise and focus.

Patient safety: that is what our goal is. We strive to improve the safety of the patient and take it to the next level. For this reason most of our disposable products are sterilised en packed seperately in user friendly packings. All our products are labeled in accordance with the MDR, or other applicable standards like FDA. Each packing is provided with a GS1 barcode or datamatrix (UDI).

#### **IRRIGATION TUBE SET**

Endoss has disposable irrigation tube sets available for different types of brands flushing pumps. In order to prevent micro-organism to get in contact with the sterile water, a filter is placed in the cap. Research has shown that after 24 hour the water is still bacteria free.

Other advantages of this product are:

- Disposable (24 hour)
- Universal cap
- Suitable for the most familiar flushing pumps
- Filter in the cap, sterile water remains sterile
- Back-flow valve in the connector

**Disposable (24h) irrigation tube set**For Olympus OFPII and other flushing pumps

ART. NR. 30082 PACKAGE **4**x10

**Disposable (24h) irrigation tube set**For Erbe and Olympus flushing pumps

ART. NR. 30081 PACKAGE 4x10

#### RINSE AND INSUFFLATION TUBING

Besides irrigation tube sets Endoss has disposable rinse and insufflation tube sets. Suitable for the most well-known brands endoscopes and CO2 insufflators. With an long extension for the CO2 it is no longer necessary to purchase a separate CO2 tube.

Other advantages of this product:

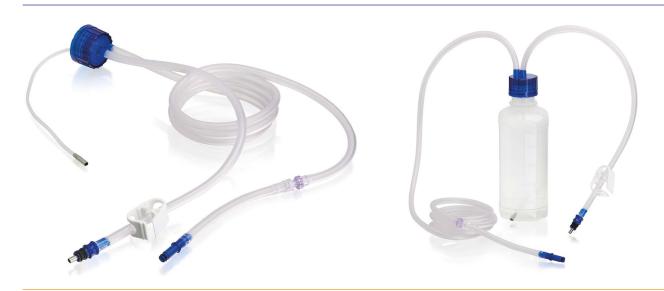

- Disposable (24 hour)
- Universal cap
- Suitable for the most well-known brands endoscopes and CO2 insufflators
- Filter in the cap, sterile water remains sterile
- Back-flow valve in the CO2 tube

Disposable (24h) Rinse and insufflation tube For Olympus with filter in the cap and long CO2 extension

ART. NR. 30096 PACKAGE 4x10

**Disposable (24h) Rinse and insufflation tube**For Pentax with filter in the cap and long CO2 extension (also for separate extension for air)

ART. NR. 30097 PACKAGE 4x10

Disposable (24h) Rinse and insufflation tube

For Fujinon 500/600 serie (also available for Fujinon 700 serie)

ART. NR. 30100 PACKAGE 4x10

Disposable (24h) CO2 tube

ART. NR. 30070 PACKAGE 4x10

**Disposable (24h) Rinse and insufflation tube**For Olympus with filter in the cap and short CO2 extension

ART. NR. 30098
PACKAGE 4x10

#### **REUSABLE VALVES FOR ENDOSCOPES**

Reusable valves for endoscopes require a difficult and precise cleaning procedure that needs to be followed according to the manufacturer's instructions. With our single use valves manually cleaning becomes unnecessary. The single use valves contribute to the patient safety and ensure an optimized infection prevention.

#### Features:

- Available as sets but also as separate products
- Less effort for the CSSD employers
- Increase patient safety
- Available for all well-known brands endoscopes

#### Single use valve set

With suction, air/water, biopsy Valve & auxiliary water connector Suitable for Olympus endoscopes

ART. NR. 30077 PACKAGE 1x50

#### Single use valve set

Suction, air/water, biopsy Valve & auxiliary water connector Suitable for Pentax endoscopes

ART. NR. 30078
PACKAGE 1x50

Single use valve set

suction, air/water, biopsy Valve & auxiliary water connector for Olympus endoscopes

ART. NR. 30075 PACKAGE 1x50

Single use valve set air/water

For Olympus endoscopes

ART. NR. 30074
PACKAGE 1x50

Single use auxiliary adapter

For Olympus endoscopes

ART. NR. 30055
PACKAGE 1x50

**Single use auxiliary adapter** For Pentax endoscopes

ART. NR. 30054
PACKAGE 1x50

Single use biopsy valve For Olympus/Fujinon endoscopes

ART. NR. 30011 PACKAGE 4x100

**Single use biopsy valve** For Pentax endoscopes

ART. NR. 30016 PACKAGE 4×100

# | **Endoscopy** - Reusable valves for endoscopes

**Single use biopsy valve**With irrigation option for Olympus/Fujinon endoscopes

ART. NR. 30010 PACKAGE 1x100

#### **ADDITIONAL PRODUCTS**

Besides disposable valves, irrigation tubes and rinse and insufflation tubes we offer various other products that improve patient safety or facilitates the process.

#### These include:

- Bite blocks, for both adults and pediatric examinations
- Metal UCR adapter
- Metal bottle holder
- Polyp trap (under development)

**Single use bite block for adults**With patient friendly elastic headband

ART. NR. 30025 PACKAGE 1x50

**Single use bite block for children**With patient friendly elastic headband

ART. NR. 30026 PACKAGE 1x50

Reusable metal bottle holder Various sizes available for different type of bottles

ART. NR. **90010** PACKAGE **1** 

Reusable metal adapter UCR Enables to attach the disposable rinse and insufflation tube on the UCR insufflator

ART. NR. 30060 PACKAGE 1x50

Clip for tubing

A clip suitable for a DIN-rail to place a tube in order to prevent tubings from hanging on the floor

ART. NR. 90011
PACKAGE 1x10

As a total supplier for flexible endoscopy Endoss delivers varies types of clothing and products for protection. Endoss is always seeking for new possibilities to improve not only the safety of the patients but also for the staff.

#### **PATIENT**

During an examination it is necessary that patient and staff feel secure and safe. With our clothing we offer safety and discretion for the patient and staff/doctors.

#### Features:

- Single use clothing
- Different sizes available

**Examination pants colonoscopy**With an opening at the back with elastic band

ART. NR. 55015 PACKAGE 1x100

#### **PROTECTION**

The staff needs to be able to work in a safe way without being exposed to contaminated fluids and physical material.

We have various type of gowns

- Work safely
- Protection during the examination
- Protection during the precleaning
- Made of high quality material

Water-resistant gown
With long sleeves and practical thumb openings

ART. NR. 55012 PACKAGE 1x100

**Faceshield**Splash face protection

ART. NR. 55014
PACKAGE 1x200

# **CLEANING**

Endoss offers various solutions for a solid pre cleaning of flexible endoscopes. We offer brushes for the pre cleaning of the channels of flexible endoscopes.

Over the 10 years Endoss has sold their brushes throughout Europe. In this period we produced and delivered millions of brushes. We have a wide range of brushes for all types and brands of endoscopes.

#### SINGLE AND DOUBLE BRUSH

Various methods and endoscopes require different types of brushes. The Single and the Double Brush are brushes that can be used for the pre cleaning of the channels of the endoscopes. The Single Brush can be pushed in and pulled back. The Double Brush can be inserted in the channel of the endoscope and pulled through the whole channel.

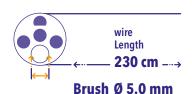

Brushes can be custom made if your desired type is not in our product range.

Characteristics of our brushes are:

- 5mm diameter brush
- User friendly
- Suitable for pull through and pulling back the brush

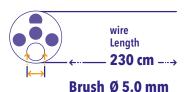

Single Brush L230cm

ART. NR. 10010 PACKAGE 4x100
